## GHOST HAUNTS FAMILY

**Young boy claims he is being haunted by a ghost.**

BY TAYLOR

The quiet town of Ledsham was in havoc yesterday because of a local boy (James Harrison, 10 years old) claiming that he is being haunted by a sorcerer from the 18th century. Could this be true? Or could it be a mischievous boy playing a prank on the town?

After interviewing the victims, James told us that the ghost had lived at his house (East End Cottage) in the past and they have just moved to Ledsham two weeks ago.

Since they moved in two weeks ago, even James' mum - Mrs Harrison, who doesn't believe in ghosts - has confirmed that vases have been smashed, rooms have been trashed and strange activity has been happening. However, Mr and Mrs Harrison still don't think it is a ghost - they think it's James!

James said, "Thomas Kempe is terrorising me! My mum and Dad don't believe in ghosts so they think it's me."

EAST END COTTAGE.

This statement could be true due to the words of a respected, well known builder, Bert Ellison. These are Bert Ellison's words on the situation.

"The young boy is telling the truth. I have been a professional ghost catcher in this town for 26 years, I know when there is a ghost somewhere."

James' sister (Helen Harrison) has told us that James is well known for lying and causing trouble. However, she also told us that she actually believes in ghosts and on this occasion thinks James is telling the truth.

After more interviewing, we have found out that the ghost's

name is Thomas Kempe. After that, we got a lead on who Thomas Kempe was. We found out that he was indeed a sorcerer from the 18th century / 1700s. This poltergeist could be more real than everyone initially thought.

Several weeks have passed since the incident. Word has it that James and Bert are celebrating that the ghost has indeed been caught. If you have any other ghostly activity in Ledsham, let us know. Just in case Thomas Kempe wasn't the only ghost...
